1. Introduction

The purpose of this user manual is to describe the steps to configure the Multifactor Authenticator (MFA) in the SUGUS portal.

2. Prerequisites

Before starting with the configuration, it is necessary to achieve some prerequisites depending on the MFA method that is going to be used.

Below you will find the prerequisites for each method.

2.1. E-mail

This method is only available for users registered in SUGUS with an e-mail not belonging to the telefonica.com domain.

2.2. smartphone

To use your smartphone as a second authentication factor, it is necessary to have installed one of the two MFA applications supported by SUGUS: Microsoft Authenticator or Latch. Both applications can be downloaded from the smartphone's marketplace: Play Store in case of Android or App Store in case of IOS.

Once the application has been downloaded, follow the steps below depending on the application.

3. Instructions for configuring MFA

Below you can find instructions for each of the MFA methods:

3.1. APP Latch

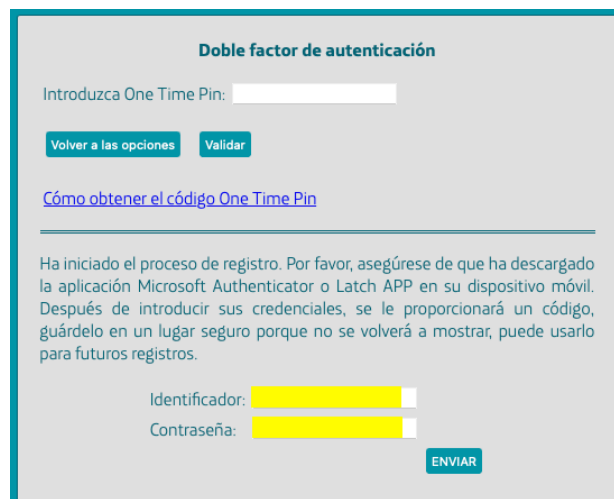

- 1- Access the SUGUS portal (<https://sugus.telefonica.com/>) and enter your username and password:

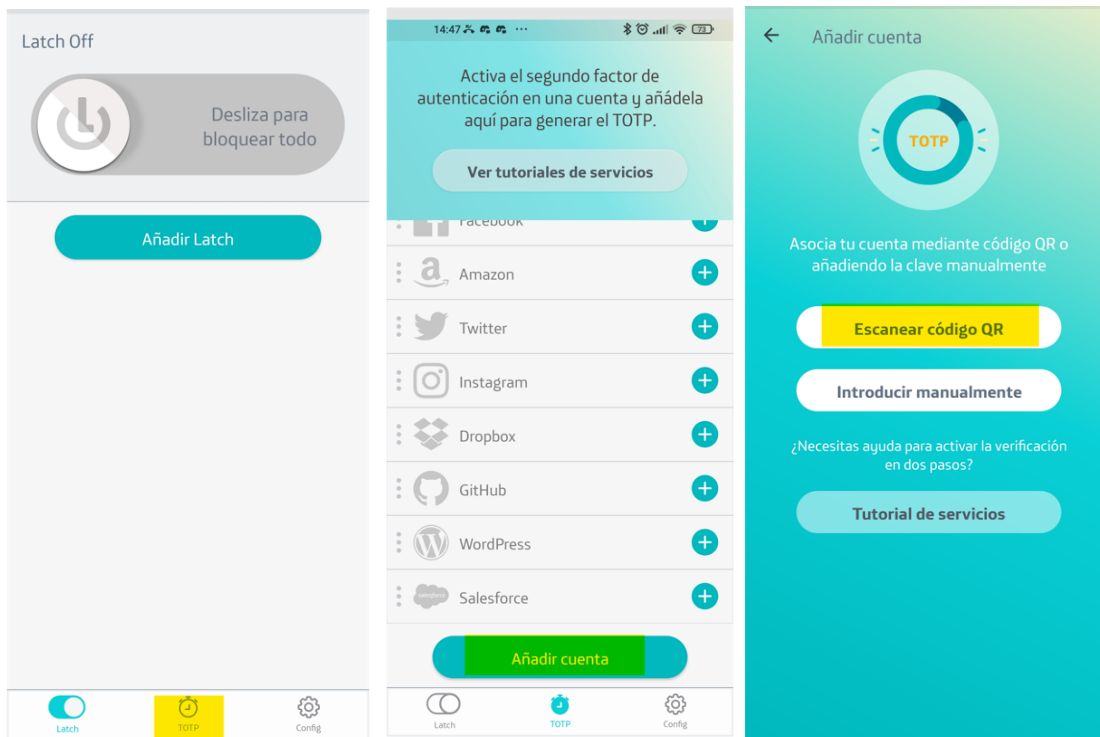

2- On the next screen, click on the option “how to obtain the one time pin code”.

3- A screen will be shown asking for the SUGUS credentials in order to show the QR code that to be scanned from the mobile APP.

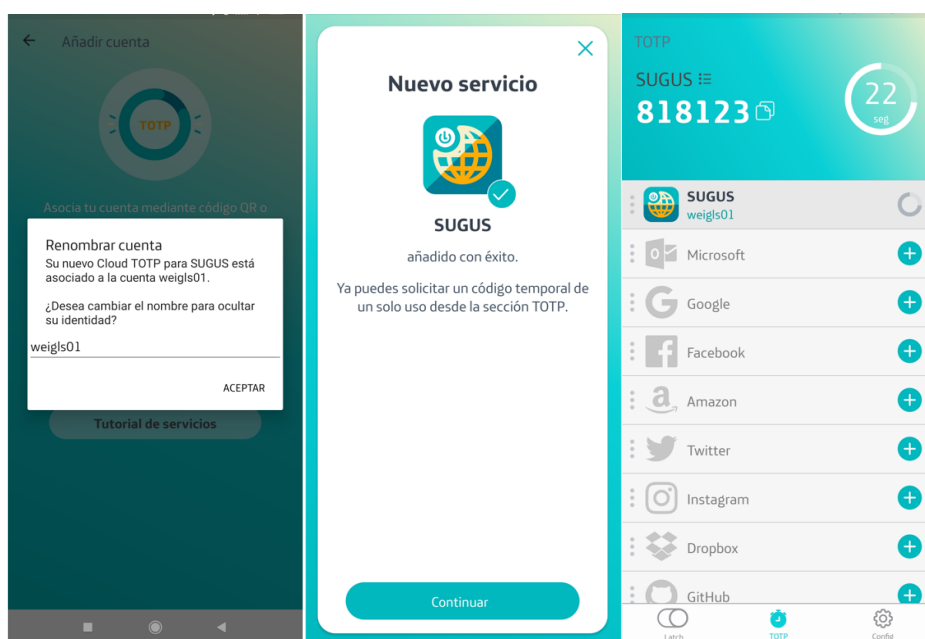

- 4- On the smartphone, register in the Latch APP if you do not have a user yet.
- 5- On the main screen of the APP Latch after logged in, click on the TOP option, in the next screen go down until the “add account” option is visible and click on it. On the next screen, select the option to scan the QR code and give permission for the APP to use the smartphone's camera.

- 6- Next, scan the QR code showed in SUGUS portal using the Latch APP. **This QR code will only be shown only once, in case you need to link more devices you must store this code in a safe place.**

- 7- Latch APP you will show a screen to rename the SUGUS service, press continue. Next screen will show that the SUGUS service has been successfully added, press continue. On the next screen you will see all the services that you have already linked in Latch. Each time you access the SUGUS portal, after entering the username and password in the portal, you will be asked to enter the MFA code shown in the Latch APP for the SUGUS service. Remember that the displayed code has an expiration period indicated in seconds.

3.2. APP Microsoft Authenticator

- 1- Access the SUGUS portal (<https://sugus.telefonica.com/>) and enter your username and password:

The screenshot shows the login page of the SUGUS portal. At the top, there is a dark blue header with the SUGUS logo on the left and 'Telefónica Global Solutions' on the right. The main content area is a light gray box with the title 'Credenciales de Usuario'. Below the title, there is a paragraph of instructions: 'Introduzca su Nombre de Usuario y su Contraseña para acceder al Portal SUGUS (Sistema Unificado de Gestión de Usuarios). Se le dará acceso a las funcionalidades y a los servicios definidos.' There are two input fields: 'Identificador:' and 'Contraseña:'. A blue link 'Olvidó su contraseña' is next to the password field. Below the fields is a blue 'LOG IN' button and a blue link 'Instrucciones MultiFactor'.

- 2- On the next screen, click on the option “how to obtain the one time pin code”.

The screenshot shows the 'Doble factor de autenticación' screen. At the top, there is a dark blue header with the SUGUS logo on the left and 'Telefónica Global Solutions' on the right. The main content area is a light gray box with the title 'Doble factor de autenticación'. Below the title, there is a text prompt 'Introduzca One Time Pin:' followed by an input field. There are two buttons: 'Volver a las opciones' and 'Validar'. Below the buttons is a yellow highlighted link 'Cómo obtener el código One Time Pin'.

- 3- A screen will be shown asking for the SUGUS credentials in order to show the QR code that you will have to scan from the mobile APP.

Doble factor de autenticación

Introduzca One Time Pin:

[Volver a las opciones](#) [Validar](#)

[Cómo obtener el código One Time Pin](#)

Ha iniciado el proceso de registro. Por favor, asegúrese de que ha descargado la aplicación Microsoft Authenticator o Latch APP en su dispositivo móvil. Después de introducir sus credenciales, se le proporcionará un código, guárdelo en un lugar seguro porque no se volverá a mostrar, puede usarlo para futuros registros.

Identificador:

Contraseña:

[ENVIAR](#)

- 4- On the smartphone, register on the MS Authenticator APP if you do not have a user yet. On the main screen of the APP once you logged in, click on "+" to add a new service, then select the option "Other account (Google, Facebook, etc.)", this will activate the camera to scan the QR code shown in the SUGUS portal.

- 5- Next, scan the QR code shown in the SUGUS portal through the Latch APP. **This QR code will only be shown once, in case you need to link more devices you must store this code in a safe place.**

- 6- Next screen you will show all the services that you have already linked in MS Authenticator. Every time you access the SUGUS portal, after entering your username and password, you will be asked for the MFA code that you will find in the MS Authenticator APP for the SUGUS service. Remember that the displayed code has an expiration period indicated in seconds.

3.3. E-mail

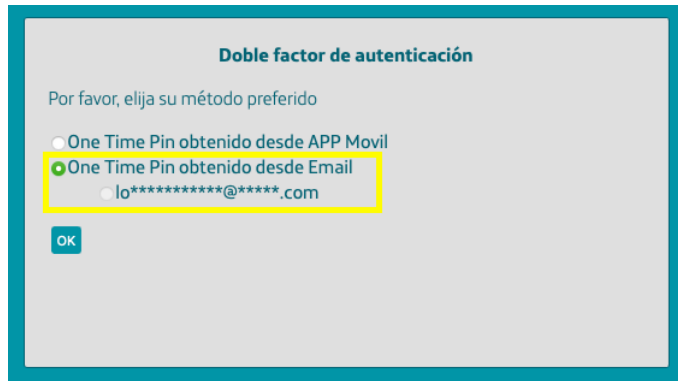

If your user registered in SUGUS has an e-mail not belonging to Telefonica domain (@telefonica.com), you will have the option to get OTP code through your email address.

To complete e-mail as OTP channel, follow next steps:

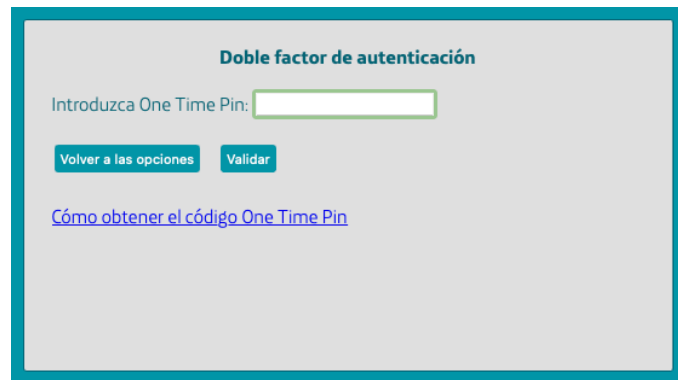

1. Access the SUGUS portal (<https://sugus.telefonica.com/>) and enter your username and password:

2. Select the option "One Time Pin obtained from Email" and click OK

3. Next screen will ask you to enter the received PIN by e-mail:

The e-mail received in the e-mail address associated to the SUGUS user, will look like this:

4. Enter the received pin and click on “Validate”
